

Plasticity across the brain: experiments & theory, excitation & inhibition

Supported by: PSL*, Labex MemoLife

Mardi 8 septembre - 9h-12h30

Thomas Nevian (University of Bern)
Neuronal plasticity in the anterior cingulate
cortex in neuropathic pain

Jesper Sjöström (McGill University,
Montreal)
Synapse-specific expression of ionotropic
glutamate receptors in neocortical microcircuits

Régis Lambert (UPMC, Paris)
Sleep slow wave-related homo and
heterosynaptic LTD of intrathalamic
GABAergic synapses

Boris Barbour (ENS, Paris)
New theories of learning in the cerebellum

Organizer: Mariano Casado, ENS, Paris

PSL - Amphi Hubert Curien
62bis rue Gay Lussac
75005 Paris
