

Mini-symposium on eukaryotic translation

October 16th, IBENS, room Favard, 46 rue d'Ulm, Paris

14h00 — 14h45 **Edouard BERTRAND**, IGMM, Montpellier, France

A localization screen reveals translation factories and widespread co-translational protein targeting.

14h45 — 15h30 **Marvin TANENBAUM**, Hubrecht Institute, Utrecht, The Netherlands

Observing translation dynamics and heterogeneity using live-cell single-molecule imaging.

15h30 — 16h00 **Oh Sung KWON** (team Hervé Le Hir), IBENS, Paris, France

Cell cycle dependent localization of EJC unveils mRNA trafficking around centrosome.

16h00 — 16h30 **Coffee break**

16h30 — 17h15 **Dominique WEIL**, IBPS, Paris, France

The GC content of human mRNAs shapes their storage in P-bodies and their decay.

17h15 — 17h45 **Vinko BESIC** (team Alice Lebreton), IBENS, Paris, France

Control of host translation during infection by *Listeria monocytogenes*.

17h45 — 18h30 **Jean-Jacques DIAZ**, CRCL, Lyon, France

Ribosome alterations in cancer: impact on translational control and tumorigenesis.

Please stay a little longer and share a drink with us!
